Message from the Guest Editors

Dear Colleagues,

The 2030 Agenda for Sustainable Development, proposed by the United Nations in 2015, set 17 goals that challenge nations to act in a global partnership towards a better future. The aim of this Special Issue is to bring together recent challenges and scientific developments addressing decision making within the context of the Sustainable Development Goals (SDG). The topics of interest include the following fields:

- Data-driven application;
- Closed-loop supply chain modeling;
- Sustainable supply chain management;
- Tertiary logistics;
- Reverse logistics;
- Multiple criteria decision making in sustainability;
- Reference-point-based models;
- Group decision-making models;
- Sustainability indicators, including life cycle analysis.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded and Social Sciences Citation Index (Web of Science), as well as Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2019).
