Culture. Society. Economy. Politics is an online open-access interdisciplinary academic publication. It aims at providing both professionals and academics with an overview of the interactions and interdependencies of culture with society, economy, and politics, developing a transdisciplinary framework. The journal is designed to challenge researchers to test the boundaries between cultural, social, and political studies, between humanities and economics. The journal welcomes studies in a wide variety of fields, encompassing but not limited to anthropology, cultural economy, consumer culture, culture and activism, cultural tourism, intercultural management, management of cultural organizations, cultural policies, cultural diplomacy, cultural security, or sociology of knowledge. It also observes a practical focus and bearing, encouraging submissions to be practice-oriented and relevant for the contemporary world.
